ABOUT BROCHURE

This brochure fits for all our LCD lift.

- Safety and maintain: Provide all details for solving technical support.
- Offer summarize of this brochure, including logo and other content.
- Product specification: Central description about LCD lift.
- Installation: General description about how to install and operate.
- Warranty: Warranty conditions.

ABOUT LOGO

NOTE: Signs importance information to help you operate the lift.

NOTICE: Notify something forbidden.

CAREFUL: May be hurt our body and tell you how to avoid.

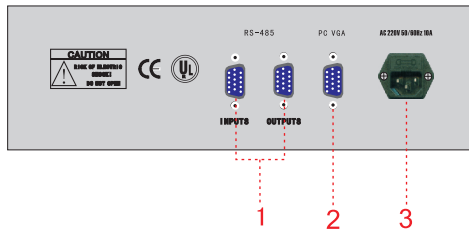

PRODUCT INTRODUCTION:

Features

- ✧ Precise structure:
 - ✓ Working with straight Bearing and Track; Japanese electrical machine, lower noise and stability.
 - ✓ Panel and other driving structure made by Aluminum Alloy mould. By electric oxide and drew bench. Light weight and simple structure.
 - ✧ Best design:
 - ✓ Without plumbum;
 - ✓ Power cost lower than average cost.
 - ✓ Self-check and self-repair.
 - ✧ Excellent function:
 - ✓ With RF mould, high anti-jamming design and with out mass cables in the desk.
 - ✓ Three control ways: signal control, remote control and centre control.
-

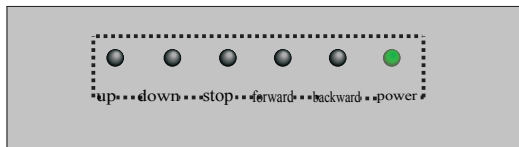

FUNCTION INTRODUCTION:

Input:

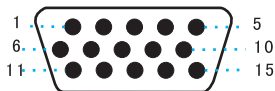

1. RS485 socket
2. 15-pin VGA
3. Voltage: 220V Insurance 3.15A

Panel button:

15-pin VGA

NO.	INTERFACE	NO.	INTERFACE
1	Red video input	9	+5V
2	Green video input	10	Logic ground line
3	Blue video input	11	Ground line
4	Sense (GND)	12	Serial Data Asset (SDA)
5	Plug and Play detection	13	Level and Vertical
6	Red ground video input	14	VCLK for DDC
7	Green ground video input	15	SCL
8	Blue ground video input		

OPERATE INTRODUCTION

Operation:

After connect all lines and open power supply then you can operate the lift.

Control ways: panel button control.

Control ways:

- Single control: each has a remote collector.
- Wireless control: most 6 group and controlled by remote-control handle.
- RS485 central control: Serial Port (Mostly 15 group).

Power indicator light

Note:

All remote controllers has English introduction; when the light is dark, please change battery.

Clean old code:

- Push up and stop button at the same time and the blue light will flicker slowly. When it flicker quickly, but out your finger.

- **Separate group control:** After success logo in, you can control the group.

SPECIFICATION

connecting port	15-pin VGA
control ways	panel control, remote control, RS485
speed	up: 35s; down: 32s
max capacity	9KG - 12KG
pitching angle	forward: 0 degree; backward: 15 degree
noise	lower 30DB
electric power	18W
power	220VAC 50/60HZ
power consumption	28W
humidity	5 degree- 40 degree(working)
relative humidity	20%- 80%
