5.0 m   935-BA50

Recommended Accessories

429-C093 Allround Cable Tray

935-TK28 Mounting Bracket

Considerations when using HDMI.
Usually, you should not exceed a length of 8-10 meters for good signal! Amplifiers should be used at longer installations! There are many factors that affect the signal - the cables quality, contacts, amount of data (resolution) and source strength.
